Office of Planning, Design and Construction

CONSTRUCTION ACTIVITY NOTICE
Heating Plant Boiler/Generator Project

October 21, 2016
Adjacent Building Occupants near the Heating Plant
Athletics Department, Facilities Operations’, Student Life, WCMA/Lawrence Hall, Dining Services.
This correspondence provides an update for the Boiler/Generator project at the Heating Plant.

Work Activities: Mobilization/Construction Fence Installation

Impact to Adjacencies:

- In preparation of construction activities at the Heating Plant for the boiler/generator project, construction fence will be installed according to the attached sketch. This will result in the loss of approximately 8-10 parking spaces near the Heating Plant.
- The construction fence will be installed Wednesday, October 26, 2016. The fence will remain in place for approximately 12-13 months.
- Sometime during the winter months the fence area will be expanded to accommodate delivery of equipment and material, but another notice will be sent out prior to the expansion.
- No road or sidewalk closures are proposed at this time and access to and from all buildings will be maintained.
- There will be noise related to this construction activity. The majority of the work proposed at this time is only related to the boiler component of the project, and that work is within the walls of the Heating Plant. Work hours are Monday – Friday, 7AM-6PM.

If you have any questions or concerns, please contact:

Jason Moran
Sr. Project Manager
Williams College
