CONSTRUCTION ACTIVITY NOTICE
Christmas Brook Culvert

November 18, 2016
Latham & Meacham Street Residents
This correspondence provides an update for the planning of the Christmas Brook Culvert.

Work Activities: Topographical survey & geotechnical activities

Impact to Adjacencies:

- Beginning November 28, a design team will be on campus in the area of Latham and Meacham Street gathering information for the planning of Christmas Brook project. Attached is a letter that will be placed in the mailbox of the residents of both streets.

If you have any questions or concerns, please contact:

RE: Topographical Survey / Borings along Latham & Meacham Street

To: Latham & Meacham Street Residents

Williams College is in the early stages of planning drainage improvements for the Christmas Brook Culvert. I wanted to make you aware that it is proposed to complete field work during the week of 11/28 in the area of Latham & Meacham Street to assist with the planning stage of this project.

Surveyors will be obtaining physical site features such as road alignments, sidewalks, trees and utilities. They will also be surveying on each individual property to locate property line information, structures (house/garage) driveway, walkway, etc. The property line information will be needed to understand right of ways and setback distances per the Town of Williamstown Zoning Bylaws. This survey work is scheduled to be completed during the week of 11/28.

To better understand subsurface conditions in the area of Latham and Meacham Street, there will be a geotechnical investigation completed 12/1-12/2 at certain locations within these two streets. The investigation involves a drill rig performing borings within the road. The boring is approximately 4-6” in diameter and the road will be repaired immediately. There will be a police detail directing traffic.

There will be no impact/disturbance to your property for the completion of this field work. Should you have any questions/concerns/comments, I have provided my contact information below. This will likely be the first of many documents/notices that I will be sending for the foreseeable future so I would encourage you to reach out to me with any concerns you may have.

Sincerely,
