Adjacent Building Occupants near the Heating Plant

Athletics Department, Facilities Operations’, Student Life, WCMA/Lawrence Hall, Dining Services.

This correspondence provides an update for the Boiler/Generator project at the Heating Plant.

**Work Activities:** Mobilization/Construction Fence Installation

**Impact to Adjacencies:**

- In preparation of construction activities at the Heating Plant for the boiler/generator project, the existing construction fence will be expanded from the current arrangement in accordance with the attached sketch. This will result in the loss of approximately 6-8 additional parking spaces near the Heating Plant.
- The construction fence will be expanded on Monday, December 5th. The fence will remain in place for approximately 8-10 months.
- The exterior metal stair that is located on the east side of the garages of Facilities’ we be closed indefinitely.
- There will be noise related to this construction activity. The majority of the work proposed at this time is only related to the boiler component of the project, and that work is within the walls of the Heating Plant. Work hours are Monday – Friday, 7AM-6PM.
