CONSTRUCTION ACTIVITY NOTICE

Electrical Expansion

April 25, 2017

Area around the Heating Plant, Hockey Rink, Danforth, The Log, Mullen House, B&L Building, Spring and Walden Street, Bookstore and Science Center construction sites, Doughty and Hewitt House, Hoxsey Street, Health Center, Stetson Court, Faculty rentals along Stetson Court, modular office/classroom buildings, Miller House, Horn Hall, Bascom and Perry House, buildings along Chapin Court, South Street and CDE.

This correspondence provides an update for the expansion of the college electrical system.

**Work Activities:** Construction

**Impact to Adjacencies:**

- Beginning May 1 and ending in September 2017, there will be construction along the south side of campus to expand the electrical system. See the attachment which calls out locations of the proposed work. Note that the area depicted on the map isn’t the entire area that will be impacted. In most cases, the work area will be much less then what is shown on the attachment.
- Over the next few days, I will work directly with all that will be impacted specifically for the first phase of construction which starts next week. As the project moves west, I will start to work with those impacted.
- No roads will be closed as a result of this work. Some parking may be impacted but the goal is to replace all areas disturbed immediately prior to moving onto another phase.
- Police detail will be scheduled when crossing Town Roads.
- There will be temporary fencing installed within the area of work. These fences will be adjusted with the work area accordingly.
- This work will be a disruption to your daily routine around campus within the project areas. I will work closely with all that are impacted to limit the disruption. Thanks for your patience in advance.
