May 15, 2017

This correspondence provides a status to campus pedestrians and automobile drivers.

**Dates for Activity:** May 17, 2017 to approximately May 25, 2017 (Notice will be reissued after Commencement)

**Work Activities:** A small crew will be replacing the heads of light poles in the Southwest Quadrant of campus (see attached map). The area is bounded by Main St., West of Spring St., Thompson Health Center, Stetson Court, and South St. This also includes pathway area between Jesup Hall and Morgan Hall. They will be using one vehicle and a lift.

**Impact to Campus Community:**

- Campus paths and sidewalks may be blocked, adjacent to the light pole being worked on, for a few minutes up to an hour, depending on the condition of the fasteners. There should be no problem walking around the blockage.

- The activities in the immediate vicinity of Brooks, Spencer, Chadbourne, Agard, Horn, and Burnet, will be conducted after the end of the College’s Finals Period (May 23rd through May 25th). Work will be performed adjacent to, but away from residence areas. Every reasonable consideration will be taken to ensure the noise will not interfere with the associated residents. All work in this zone will be performed during normal business hours. No work will be performed Friday, May 28th. A subsequent CAN will be issued after commencement to finish associated work.

- Two parking spaces adjacent to light poles in parking lots will need to be vacant on the day that work is to be done in the lot. Every effort will be made to minimize the number of spaces set aside on any given day to perform the work. Signs and/or barriers will be put in those spaces prior to the start of the work day. The signs and/or barriers will be removed immediately after work is complete to open up parking spaces.

- Noise should be minimal and limited to vehicle and lift engines as well as handheld power tools.

If you have any questions or concerns, please contact:
