May 22, 2017

**Impact Area:** Bronfman Science Center, Hoxsey Street, sidewalks near/around Bronfman Science Center, grass area to the north of Spencer and Brooks House.

This correspondence provides an update for the North Science Utility Enabling Project.

**Work Activities:** Utility installation along the north, west and south side of Bronfman Science Center.

**Impact to Adjacencies:**

- In preparation for the demolition of Bronfman Science Center in the future, a utility enabling project will be required. Currently there are some utilities that pass through Bronfman and serve MSL. These utilities need to be relocated this summer.
- Work will begin with borings scheduled for May 23-26. The only impact during this time will be the temporary closure of some sidewalks in the area of the borings.
- Tree removal will follow during the week of May 29. The only impact during this time will be the temporary closure of some sidewalks in the area of the tree removal.
- Installation of chilled water, steam, electric and telcom will begin during the week of June 5 and is expected to be completed in October 2017.
- The work flow is expected to travel north to south. All entrances/exits to Bronfman will be maintained at all times (though there may be temporary walkways). A temporary sidewalk will be located on the west side of Hoxsey Street as the existing sidewalk on the east side will be closed during construction. There will be limited access to the loading dock throughout this construction. If there is a known delivery or need to use this dock area, please let me know in advance and we will do our best to try and accommodate.
- Work hours are Monday – Friday, 7AM-6PM. There will be construction noise that is common with this type of utility installation (utilizing heavy equipment). There will be a time when the noise and disturbance levels are extremely disruptive and that will be when ledge is removed. A construction fence will be installed in the area of the work, please respect the location and do not enter the site.
