Adjacent & Building Occupants of: Mission Park Dormitory

This correspondence provides a status update for the MISSION PARK ROOF REPLACEMENT PROJECT

**Dates for Activity:** June 12 to August 25

**Work Activities:** Work is scheduled to begin on Monday June 12th. The existing roofing membrane and insulation at Armstrong, Pratt, Dennet, Mills & the Dining Hall will be completely removed and replaced. Associated flashings will be replaced and equipment curbs raised to accommodate the increased insulation thicknesses.

**Impact to Adjacencies:**

- A portion of the Thompson Lot will be used as a lay down area for materials
- Parking spaces on the north side of Mission Park may be blocked off during periods of time to accommodate the distribution of materials and placement of dumpsters.
- Dumpster(s) and lifting equipment will be located on the north side for access to the dormitory buildings and on the south side to access the dining hall.
- This will be a very active work site as the old materials are removed and the new materials put into place.
- A certain level of noise and dust associated with the removal and replacement processes should be anticipated.
- Normal work hours are 7:00 AM to 5:00 PM but may be extended later in the day as required to provide a water tight condition at the end of the shift/day
