CONSTRUCTION ACTIVITY NOTICE
Utility Expansion/Burnett House Demolition

August 16, 2017

Work Area: Spring/Walden Street.

This correspondence provides an update for the expansion of the college utility system and house demolition.

Work Activities: Conduit installation crossing Spring Street and Burnett House Demolition.

Conduit Installation Impacts:

- The conduit installation is proposed to cross Spring Street starting August 21. This crossing will force a traffic detour in the area until September 1. The area of the crossing is at the crosswalk after Walden Street and before the B&L building.
- A sketch is attached showing the detours. Traffic heading south down Spring Street will be directed west towards Walden Street. Traffic heading north along Spring Street will be directed through the public parking lot towards Walden Street. Traffic heading east along Walden Street will be directed through the public parking lot to Spring Street.

Burnett House Demolition Impacts:

Starting the week of September 4, preparations for the demolition of Burnett House will begin. Walden Street will be closed during this time. It is expected that Walden Street will be closed for approximately 3 days. The detour for this work will be exactly as it was with the construction of the Bookstore. The exact date of this closure will be communicated in a forthcoming notice.

For both projects, temporary fencing will be installed within the area of work. These fences will be adjusted with the work area accordingly. Please respect the location of the fence and do not enter the site.
