Office of Planning, Design and Construction

CONSTRUCTION ACTIVITY NOTICE 1

Bronfman Science Center, Abatement

September 15, 2017

Adjacent & Building Occupants of: Bronfman Science Center

This correspondence provides a status update for the abatement of Bronfman Science Center, Phase 1

Dates for Activity: October 9 – 31 (Phase 1)

Work Activities: Work on Phase 1 hazardous materials abatement is scheduled to begin on Monday October 9 and will limited to certain vacated areas in the north wing of floors 2 and 3. In addition to interior abatement, exterior windows in these areas will be removed and the openings temporarily in-filled. Containment barriers will isolate work areas from the remaining portions of Bronfman and the surrounding area.

Impact to Adjacencies:

- A work plan with the Abatement Contractor is currently being refined and more details will be released as this plan is finalized.

- An exterior construction stair and potentially exterior scaffolding may be required at the north wing of Bronfman, however means of egress from the building will not be impaired.

- This area will be an active work area as the old materials are removed from the site.

- A certain level of noise associated with the removal processes should be anticipated.

- Normal work hours are 8:00 AM to 5:00 PM but may be extended later in the day as required.
