Office of Planning, Design and Construction

CONSTRUCTION ACTIVITY NOTICE

Utility Expansion

October 3, 2017

Work Area: Hockey Rink, B&L Building, The Log, grass area along Walden Street, shoulder of the construction access road near the Health Center and behind the rental properties along Stetson Court.

This correspondence provides an update for the expansion of the college utility system.

Work Activities: Cable installation.

Impact to Adjacencies:

- Installation of the subsurface infrastructure relating to the Utility Expansion project is complete. The next step is to install cables. This will require Utility vehicles placed at various locations along the alignment of the newly installed ductbank. These vehicles are similar to a National Grid or Verizon utility vehicle.
- Work is scheduled to begin on October 4 and continue for approximately 1 week. A sidewalk and a few parking spaces may be blocked off from time to time as we proceed to install the cable from east to west. No roads will be closed at any time.
- There will be temporary fencing installed within the area of work. These fences will be adjusted with the work area accordingly. Please respect the location of this fence and do not enter the site.
