Office of Planning, Design and Construction

CONSTRUCTION ACTIVITY NOTICE

Christmas Brook Culvert

November 20, 2017

Weston Field, Latham & Meacham Street, Heating Plant Drive, Dirt Parking Lot Area and Water Street.

This correspondence provides an update for the Christmas Brook Culvert.

Work Activities: Water Street Test Pits

Impact to Adjacencies:

- Williams College is still waiting for final permission from Mass Highway to begin construction activities in Water Street, they have agreed to allow us to perform some test pits within Water Street to confirm utility inverts. This work will take place November 21 (Tuesday) and possibly November 22 (Wednesday).
- During these two days, Water Street will limited to one way traffic.

Information from the previous CAN for this project:

- At various stages throughout construction, some roads and sidewalks will be closed as a result of this work. A full traffic management plan with specific dates will be circulated once approved from the Massachusetts Department of Transportation.
- It is proposed to begin construction on Water Street and head west through the dirt parking lot. It is possible that some work will start at the Weston Field Complex, but not before Homecoming.
- The work is scheduled to take 12 months to complete.
- During construction, this project will greatly impact your ability to navigate throughout the work area listed above in a timely fashion. There will be one way roads, temporary traffic lights, temporary sidewalks, police details for taking deliveries along sides of the roads, parking inconveniences and noise associated with substantial earthwork excavation (back up alarms, ledge removal, driving steel beams and sheets 20'-30' vertically into the ground using heavy machinery).
- More information will be distributed in the coming weeks.
