CONSTRUCTION ACTIVITY NOTICE

Christmas Brook Culvert

December 14, 2017

This correspondence provides an update for the Christmas Brook Culvert.

Work Activities: Water Street One-Lane Traffic, Weston Field Latham Street Access

Impact to Adjacencies:

- Per the traffic management plan for Water Street, traffic signals have now be installed and are active. These will remain operational for the next few months, managing one way traffic.
- Sections of the box culvert are being installed near the Latham Street entrance to Weston Field. Over the next two months, vehicle and pedestrian access will be limited or closed during periods of construction. Please use the Meacham Street entrance to gain access Weston Field.

Information from the previous CAN for this project:

- At various stages throughout construction, some roads and sidewalks will be closed as a result of this work.
- The work is scheduled to take 12 months to complete.
- During construction, this project will greatly impact your ability to navigate throughout the work area listed above in a timely fashion. There will be one way roads, temporary traffic lights, temporary sidewalks, police details for taking deliveries along sides of the roads, parking inconveniences and noise associated with substantial earthwork excavation (back up alarms, ledge removal, driving steel beams and sheets 20'-30' vertically into the ground using heavy machinery).
