## **CONSTRUCTION ACTIVITY NOTICE**

Public Parking Lot Reconfiguration

January 11, 2018

Public Parking Lot at the base of Spring Street.

This correspondence provides an update for the reconfiguration of the Public Parking Lot.

**Work Activities:** Start Date/Work Activities – Phase 3: **REVISED**

### **Impact to Adjacencies:**

- The parking lot phasing map that was circulated last week has been revised (attached). We have been monitoring construction progress (cold weather last week and rain expected over the next two days) that have modified the proposed construction activities.
- It is now proposed to not take as much property for construction and leave more parking for the next 3-5 weeks. Parking will remain (though smaller footprint) near B&L and will be expanded near Doughty House. Construction will take place in the middle of both parking areas.
- Construction for the third phase will begin starting January 16 (**previously scheduled for January 15**). A police detail will be onsite for January 16 to help direct traffic to the new parking area. Additional signage will also be installed.
- The “10 minute” parking spaces along Spring Street (outside of B&L) will remain, as will the handicap parking in its current location.
- Noise/disturbances associated with construction (back up alarms, ledge removal, excavations, dust, mud and trucks) should be expected.
- Further circulation of this document will be greatly appreciated.
- Thank you in advance for your patience while some of your daily activities are going to be disrupted for the foreseeable future.
