## **CONSTRUCTION ACTIVITY NOTICE**

Public Parking Lot Reconfiguration

March 22, 2018

Public Parking Lot at the base of Spring Street.

This correspondence provides an update for the reconfiguration of the Public Parking Lot.

**Work Activities:** Construction Update

**Impact to Adjacencies:**

- Most of the underground detention structure has been installed, which has allowed approximately 20 additional parking spaces to be added to the temporary lot. This brings the current parking space total to 110-115 along with 6 ADA spaces near B&L.
- This parking configuration and parking space count will remain as is for the upcoming weeks. The next major activity will be to begin installing pavement, which cannot occur until the end of April/beginning of May (contingent upon pavement plants opening for the season).
- There may be days when some of the ADA spaces near B&L are not accessible due to construction, but at no point will all of the ADA spaces be unavailable.
- The "10 minute" parking spaces along Spring Street (outside of B&L) will remain.
- Noise/disturbances associated with construction (back up alarms, ledge removal, excavations, dust, mud and trucks) should be expected.
- Further circulation of this document will be greatly appreciated.
- Thank you in advance for your patience while some of your daily activities are going to be disrupted for the foreseeable future.
