

January 31, 2019

A new exterior handrail will be installed to the west of Morley Science Center adjacent to the existing sidewalk. During installation, portions of the sidewalk may be temporarily narrowed. Although circulation will be maintained during installation, alternate routes are recommended. Installation is weather dependent, but we hope to begin installation the week of Feb 4, 2019 and conclude within 2 weeks.

Installation will include core drilling through the existing concrete sidewalk to allow installation of new posts. Core drilling of the concrete will generate some periodic noise and vibration.

The area highlighted in red below shows the approximate are of installation.
