

January 5, 2024

This correspondence provides an update on the construction for the Williams College Museum of Art.

Work Activities: Geotechnical Exploration, Drilling at the Williams College Museum of Art Site

Work Details:

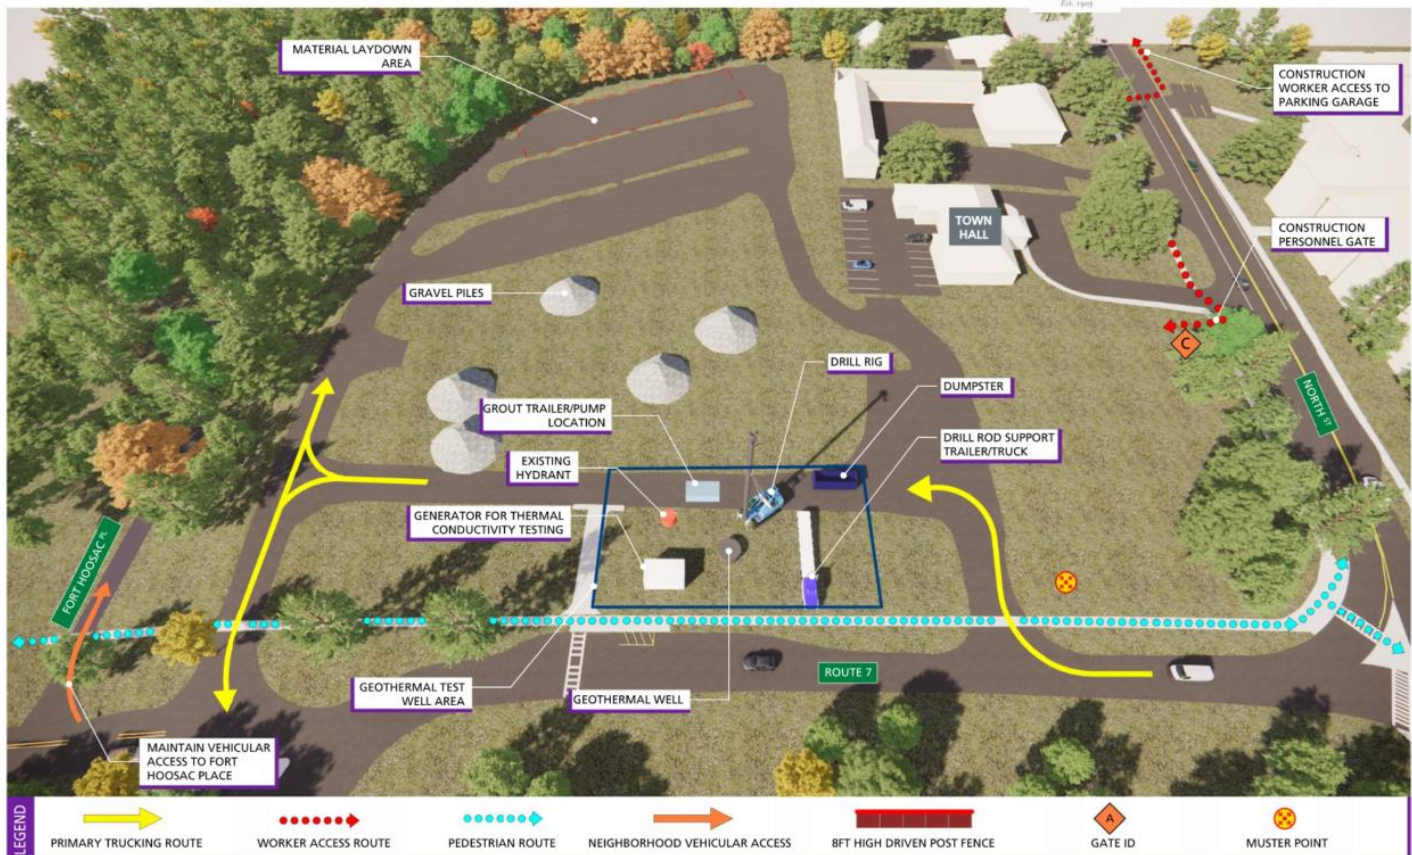

- The week of January 8th, 2024, drilling of a single geothermal test well will begin on the site for the Williams College Museum of Art (the site of the old Williams Inn). Please see the logistics drawing below for the exact location.
- Drilling and grouting of the well is set to be completed by January 13th, 2024 (schedule and weather permitting).
- Work will occur during normal regular hours, 8:00 AM to 3:30 PM. Weekend work is expected on Saturday January 13th but work is not permitted to start before 9:00AM
- Dig Safe marking layout of existing utilities was completed in December to help ensure the drilling operation will not cause utility service disruptions.
- The only expected disruption to adjacent properties is the potential noise during the drilling operation.
- A clear barrier between the drilling operation and Route 2/Main Street will be implemented to ensure pedestrian and vehicular safety.
